

## Scenario ID : 1

valid Login

### Test Steps:

1. Open pyCharm app
2. Open PyCharm project
3. Open [script.py](#)
4. Install Selenium - Python- m pip install selenium
5. Import Selenium code
6. Open Chrome - <https://the-internet.herokuapp.com/login>
7. Navigate to form Authentication
8. Enter username & password  
Username:tomsmith  
Password:supersecret
9. Click login and verify successful login
10. Verify the success message
11. Click logout
12. Run the complete python automation

### Screenshots:

The screenshot shows the PyCharm IDE with a project named 'WelcomeScreen'. The file explorer on the left shows the project structure. The main editor displays a Python script named 'script1.py' with the following code:

```
1 from selenium import webdriver
2 from selenium.webdriver.common.by import By
3 import time
4
5 # Open Chrome
6 driver = webdriver.Chrome()
7
8 # Demo login website
9 driver.get("https://the-internet.herokuapp.com/login")
10
11 # Maximize browser
12 driver.maximize_window()
13
14 # Enter Username
15 driver.find_element(By.ID, value="username").send_keys("tomsmith")
16
17 # Enter Password
18 driver.find_element(By.ID, value="password").send_keys("SuperSecretPassword!")
19
20 # Click Login button
21 driver.find_element(By.CSS_SELECTOR, value="button[type='submit']").click()
22
23 # Wait
24 time.sleep(3)
25
26 # Check result
27 message = driver.find_element(By.ID, value="flash").text
28 print("Result:", message)
29
30 # Close browser
31 driver.quit()
```

The status bar at the bottom indicates the file encoding is UTF-8, 4 spaces, and the Python interpreter is 'venv [3.14.5]'.

The screenshot shows the PyCharm IDE with the same project and script. The 'Run' button has been clicked, and the output console at the bottom shows the execution results:

```
Run script1
C:\Users\Ladu\PycharmProjects\WelcomeScreen\.venv\Scripts\python.exe C:\Users\Ladu\PycharmProjects\WelcomeScreen\script1.py
Result: You logged into a secure area!
Process finished with exit code 0
```

The status bar at the bottom indicates the file encoding is UTF-8, 4 spaces, and the Python interpreter is 'venv [3.14.5]'.

## Invalid Login

### Test Steps:

1. Open pyCharm app
2. Open PyCharm project
3. Open [script.py](#)
4. Install Selenium - Python- m pip install selenium
5. Import Selenium code
6. Open Chrome - <https://the-internet.herokuapp.com>
7. Navigate to form Authentication
8. Enter username & password  
Username:tomsmith  
Password: pawan
9. Click login and verify successful login
10. Verify the success message
11. Click logout
12. Run the complete python automation

### Screenshots:

Scenario ID : 3

Blank login

## Test Steps:

1. Open pyCharm app
2. Open PyCharm project
3. Open [script.py](#)
4. Install Selenium - Python- m pip install selenium
5. Import Selenium code
6. Open Chrome - <https://the-internet.herokuapp.com/login>
7. Navigate to form Authentication
8. Enter username & password  
Username:  
Password:
9. Click login and verify successful login
10. Verify the success message
11. Click logout
12. Run the complete python automation

## Screenshots:

Scenario ID : 4

Forgot password

## Test Steps:

1. Open pyCharm app
2. Open PyCharm project
3. Open [script.py](#)
4. Install Selenium - Python- m pip install selenium
5. Import Selenium code
6. Open Chrome - <https://the-internet.herokuapp.com>
7. Navigate to form Authentication
8. Enter username & Forgot password  
Username:  
Current Password:
9. Click login and verify successful login
10. Verify the success message
11. Click logout
12. Run the complete python automation
